Get more windows out the door with the worlds #1 window and door software solutions provider

Create simple and complex designs for your quotes

Designing and quoting on complex designs for bespoke residential or highly complex curtain walls has never been easier. Whether you are designing for residential, commercial or retail shop fronts, our software has been built to be completely customizable for your complex needs.

Produce fast accurate quotes that you can trust

Send quotes to your customers faster, knowing the information is correct and based on real time data. If customer requirements change you can update and reconfigure with ease. All your information is in one system, so when you provide quotes for a product, you can have confidence that the product can be manufactured.

Cut once - scheduling & automation for precise manufacturing

We have a range of software solutions that enable you to automate your manufacturing, in a cost effective manner. Our proven platforms can schedule your labor and equipment and seamlessly transfer complex data to your cutting machines.

COMMERCIAL
Win more profitable and
complex jobs

RESIDENTIAL
Service more clients
faster increasing turnover

SPECIALITY
Improve compliance & produce
highly complex products with ease

New features in Soft Tech V6 v3.7

The new Soft Tech V6 v3.7 upgrade comes packed with incredible benefits and over 40 new features, to ensure you are getting more windows out the door!

We've included a few of these below:

Quick Access Navigation Bar

Increase your productivity with personalized navigation on the new quick access bar.

Alternative Quote Items

Ability to provide a different price on an original estimate by creating an alternative version of your quote item with different quote settings.

Component Images

Verify visually what component you are looking at with new component image display

Curtain Wall Column/Row Mode

Save time configuring curtain wall frames by quickly adding or deleting columns or rows for a curtain wall style frame.

Gaskets a New Resource Type

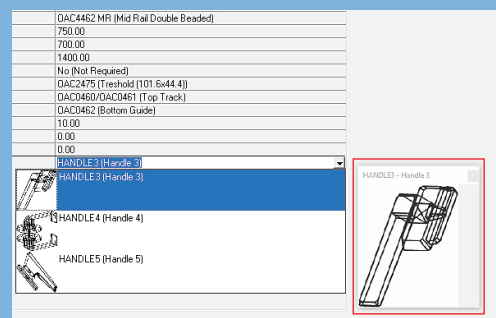

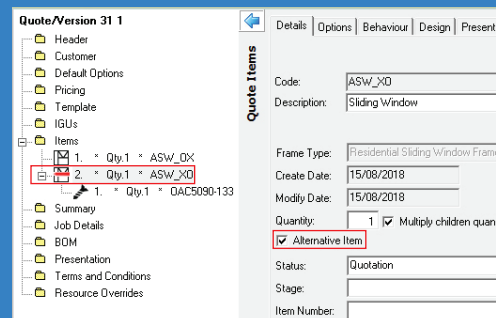

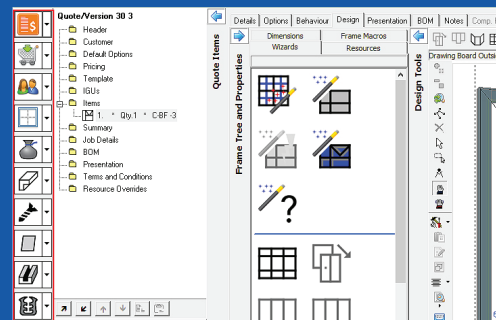

No longer need to create a new assembly if the gasket or glazing rubber changes.

User Defined Quote Options

Ability to configure the database to only present the quote options you use with no limit per group.

Production Manager

Greater flexibility and ease of use by creating production jobs from multiple quotes
