

BECOME V6 ACCREDITED IN DATABASE DEVELOPMENT

Take your V6 expertise to the next level with Soft Tech's online training V6 Accreditation.

HOW DOES THIS WORK?

The V6 Accreditation goes a step beyond just reviewing the free online training resources available at the Soft Tech Training Academy. Learners who register for and successfully complete the V6 Accreditation course modules will receive a valuable industry certification.

Not only can employers have confidence that their team is working to best practice standards, but this will assist in offering professional development scope for developer teams.

Prove your knowledge and advance your career goals

Get ahead in the industry by becoming an expert in V6. Receive a professional certification to demonstrate your competency and knowledge on the successful completion of each V6 Accreditation module.

Flexible training

Soft Tech's online V6 Accreditation allows you to plan your course training goals around your spare time, with 24/7 free access to the online Soft Tech Training Academy Resources and V6 Accreditation cloud learning environment.

Share your certification

Once you have successfully completed a V6 Accreditation module, share your new certification status with your employer, post your achievement on professional networking websites, and include it in your CV accomplishments.

Getting Started

Soft Tech's V6 Accreditation is managed via an Azure cloud hosted environment. After registration and payment, you'll receive your student portal login and a course module overview, outlining the training requirements for our chosen course.

Your Soft Tech V6 Trainer will get in touch to arrange a 30 minute online orientation meeting, to discuss the course format and set up your online meetings.

Once you've reviewed the free online training resources available at the Soft Tech Academy, you'll need to work through the accreditation training module requirements set out each week. At each stage of completion, you'll need to notify your V6 Trainer who will review your work and offer feedback. Once you've successfully completed the online training requirements for your chosen course, your V6 Trainer will email your module certification to you.

Our V6 Trainers will dedicate their time to help you achieve better results in V6 and become successfully accredited in V6.

V6 Essentials - Online Course Information

V6 Essentials is the first module available in the V6 Accreditation. The course is aimed at entry level users but also covers best practice principles, so seasoned developers can get the best out of V6.

In this module, users will learn how to create all basic resource types in V6, from loading the first extrusion into V6 to formulas, quotes and running reports, over a total of 25 lesson topics.

Two Course Options

Structured Course: Group online course, taking place over 12 weeks.

Covering 25 lessons over 3 units in learner-led study, with email support and bi-weekly live online training sessions with your personal V6 Trainer, who is the V6 Subject Matter Expert.

Where possible, we recommend enrolling 2+ learners per course to increase the V6 knowledge on site and to collaborate in knowledge sharing and peer assistance during the course.

Requirements for commencement: Minimum learners 3/Maximum learners 8.

Accelerator Course: One-to-one online course, taking place over 4 weeks.

Covering 25 lessons in learner-led study, with email support and two one-to-one live online training sessions with your personal V6 Trainer, who is the V6 Subject Matter Expert.

Should learners require additional time with the V6 Trainer, this can be arranged at an additional discounted rate on a case-by-case basis. However, we are confident that our structure will enable all learners to succeed.

V6 Accreditation - Structured Course

12-week group training sessions

Price - Module 1

\$1,590

USD per learner (Excl. Tax)

(If further changes are required, learner makes suggested changes in Week 12 for final submission.)

V6 Accreditation - Accelerator Course

4-week one-to-one training sessions

Price - Module 1

\$1,790

USD per learner (Excl. Tax)

WEEK 4

If all the course work is submitted to an acceptable standard, the trainer will award each learner with their course certification at the end of week 4.

(If further changes are required, learner makes suggested changes in Week 4 for final submission.)

V6 Essentials - Module 1

25 Lessons

Architecture Overview

Resource types and how they work together to model windows and doors in a V6 database.

Initial Setup

Key settings and options in V6.

General Data

Create and define the General Data in V6, including Customers, Suppliers, Material ++

Finishes

Create Finish Groups and Finish Colors in V6.

CAD Extractions

Extract details of CAD drawings for use in V6.

CAD Resources

Create CAD Resources in V6 and create swing indicator draw types.

Extrusions

Create extrusions in V6, including extrusion properties, material, supplier, stock length, finishes and cross section detail.

Components

Create Components in V6 - the miscellaneous parts that make up a finished frame, such as screws, handles, locks, and other hardware.

Gaskets

Create Gaskets in V6.

Fills

Create Fills in V6 - a fill is anything inserted into an opening including glass, screen mesh, panel.

Attributes

Create Attributes in V6 - attributes store custom option values, hardware options, sizes, etc.

Attachment Bags

Create Attachment Bags in V6 - set up basic hardware and accessories.

Assemblies

Set up assemblies required in a casement window.

Frame Types

Set up the default assemblies, joints, attachment bags and attributes.

Creating Your First Frame

Understanding of frame designer, object tree, Bill of Materials, CADLink ++

Creating The Sash Frame

Build a sash frame, ready to nest into the outer frame opening.

Adding the Sash to the Frame

Add sash to the casement outer frame, review the Bill of Materials and CADLink cross section.

Creating Your First Quote

Understanding of all the critical steps in creating quotes in V6.

Creating Your First Customer

Add a customer, ready to use in a quote.

Labor and Lookup Matrix

Create setup labor calculations.

Formulas and Lookup Matrix

Write Formulas and use Lookup Matrices.

Attachment Bags - Adding Labor & Components

Understanding of how Attachment Bags are created.

Placement Agent

Create a Placement Agent to locate reference points, and to attach Bags to those reference points.

Test Quote

Create a quote to test the casement window created through this training module.

Reports - Running Standard Reports

Run the standard Quotation, Costed BOM, Hardware and Fabrication Reports on a small quote.
